Product Description

Api 5l X42-X80 Oil Gas Pipe Carbon Seamless Steel Galvanized Iron Round Structure Pipe Od 18mm 6"

Seamless steel pipes have hollow sections and are widely used as pipelines for transporting fluids, such as pipelines for transporting oil, natural gas, coal gas, water and certain solid materials. Compared with solid steel materials such as round steel, steel pipes are lighter in weight when the bending and torsional strength is the same, and they are an economical cross-section steel material.
