- Highlight: **Astm A519 Seamless Mechanical Tubing, Carbon Steel Seamless Mechanical Tubing, 4130 Alloy Steel Tubing**

Product Description

Astm A519 4130 Carbon And Alloy Steel Seamless Mechanical Tubing For Parts Structures

There are two main manufacturing processes for seamless pipes: hot rolling method and cold drawing method. Hot rolling method is to heat the billet to a certain temperature, and then roll through the mill to form the tube. The cold drawing rule is to heat the billet to a certain temperature, and draw it with the cold drawing machine to form a seamless tube. These two processes each have advantages and disadvantages, according to different needs to choose the appropriate process.
